Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1636

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-3, 7, 8, 10-29, 42-45 and 75 stand, and 30-32, 36 and 37 are newly rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement, for reasons of record set forth in the previous Office Action mailed 17 November 2005.

Claims 30-32, 36 and 37 have been included in the instant grounds of rejection as the disclosure is generally dawn to therapeutic uses.

At page 8 of the amendment filed 7 April 2006, Applicants argue that the disclosed experiments in the specification and the Declaration of Scadden, show the repopulation of bone marrow in irradiated animals by human cells of the invention. The system used, SCID mice, is a model system. However, the state of the prior art and the level of skill in the art was set forth in the previous Office Action. The prior art was not achieving success with stem cell treatment methods, and so Applicants' success in the model system noted does not lead to a conclusion of enablement for the claimed invention.

Bridging pages 8 and 9, Applicants argue that p21 inhibition has been demonstrated to lead to stem cell expansion. However, as is evidenced by the problems encountered with stem cell methods in the prior art, it is not apparent that this represents the sole obstacle to therapeutic methods employing such cells.
